DETAILED ACTION

Election/Restrictions

Applicant's election of species 1 in the reply filed on 5/19/06 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 24 and 27-31 are rejected under 35 U.S.C. 103(a) as being unpatentable over Yamazaki et al. (US 2005/0037552). Yamazaki et al. disclose forming a crystalline semiconductor film by irradiating an energy beam output continuously while scanning the energy beam with an apparatus has a specular body which is fixed to a shaft and the specular body vibrates by using the shaft at its center (0029); forming a gate electrode over the crystalline semiconductor film; and forming an impurity region in the crystalline semiconductor film using the gate electrode as a mask (figure 4). However Yamazaki does not explicitly teach the formation of the blocking layer in the area where

the energy beam changes direction. But Yamazaki does disclose the formation of the blocking layer (0105) and the and the blocking layer would keep the semiconductor layer from being over exposed and peeling . Therefore it would have been obvious to one of ordinary skill in the art at the time the invention was made to use Yamazki in order to keep the semiconductor layer from peeling (0014).
